- *Easy To Apply*
- *Tested & Proven Worldwide*

QUICK & EASY APPLICATION!

Mix...

Apply...

Add Glass Beads...

DONE!

Aexcel
America's Toughest Traffic Paints

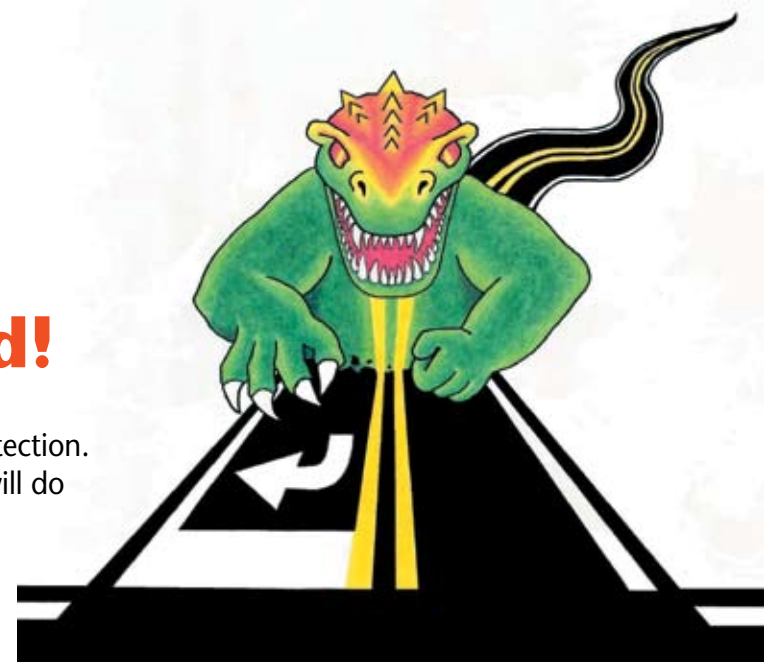

ROADZILLA!™

Outperforms Anything On The Road!

Roadzilla, the amazingly durable marking system is outperforming everything on America's roads. Rather than repainting your zone markings every year or two, Roadzilla gives you long-lasting protection. There's no need for expensive application equipment...a hand trowel or squeegee and a stencil will do just fine for auxiliary markings. Plus, it cures fast...you're open to traffic in just 20 minutes!

Roadzilla is a special two-component methyl methacrylate system which uses a blend of quality polymers. It's not only more durable and easier to apply, but with its reflective glass beads, it also significantly improves visibility and motorist safety.

Methyl Methacrylate has been in use for over 20 years worldwide. It's been road-tested and proven in Canada, England, France, Sweden, Switzerland, Denmark and Germany, as well as on some of the toughest roads in America.

Roadzilla Outperforms Other Marking Systems!

Thermoplastic

- Performance less than Roadzilla
- Shorter life span
- Requires expensive equipment & training
- Exposure to high heat

Water-Borne

- Not as durable as Roadzilla
- Does not adhere well to concrete

Solvent-Based

- Hard to clean up
- Limited durability
- Regulated use
- Waste disposal

ROADZILLA

- Exceptionally long-lasting
- Solvent-free resin
- No heat application
- No solvents to clean up
- Quick cure time
- Can be extruded or sprayed on
- Can be applied thicker than epoxy
- Outstanding adhesion to asphalt & concrete (Some concrete surfaces may require a primer for proper adhesion.)

Other Specialty Applications

For special structured ADA markings, contact Vanguard ADA Systems directly at 360.668.5700 or visit them at www.VanguardOnline.com.
